

SAFETY POLICY

Stena Teknik is a general resource for all maritime business areas at Stena. Our activities consist of newbuilding and conversion projects, general marine technical advice and procurement and contract support, as well as research and development in the marine sector.

Stena Teknik strives to perform its activities in a safe manner with no harm to our personnel and to people involved in our work.

Our safety policy is based on:

Awareness

We are aware that our work involves potential safety risks to our personnel and to people involved in our work.

Attitude

We promote a positive attitude towards safety. Everyone has the right and the support from the management and the colleagues to actively intervene whenever unsafe behaviour and potential safety risks are identified.

Improvement

We continuously strive to improve our performance in terms of safety. We investigate and report all incidents, including near misses. We promote and develop safety by providing necessary resources and training.

Communication

We communicate our safety policy to colleagues, suppliers, contractors and customers.

All employees are responsible for working safely, evaluating potential safety risks and taking measures in order to mitigate risks and improve safety.
