

## SUSTAINABILITY POLICY

Stena Teknik is a common resource for all maritime business areas within Stena. Our activities comprise newbuilding and conversion projects, general marine technical advice, procurement and contract support as well as research and development in the marine sector.

Our mission is to develop and promote cost efficient services and solutions that enable our Clients to be more sustainable in their activities and business.

Our primary means is the development and employment of our technical knowledge in sustainable solutions. Hence we are committed as follows:

- Sustainability shall through awareness, engagement and action be an integrated part of our everyday work
- Corporate and Clients' sustainability policies shall be considered in every project
- Legal requirements and Clients' expectations shall always be met or surpassed
- Availability and development of sustainable technologies shall continuously be monitored, evaluated and considered
- Sustainable and economically sound solutions with particular focus on conservation of resources, energy efficiency and emissions shall continuously be developed and promoted to our clients
